## 39 Total Hours Required in Program

## Information Systems Department MBA Student Course Electives

| Course/Offerings  | Focus of Course   | Who should take this course?  |
|---|---|---|
| MIS 5342: Business<br>Intelligence<br>(Fall & Spring)                   | This hands-on course is designed to provide practical analytic skills (techniques<br>such as RFM analysis, LOGIT, decision trees, clustering, and market basket<br>analysis) using the leading BI software tools in SASto address common business<br>problems.<br>Suggested Pre-requisite: basic knowledge of regression analysis   | <ul> <li>Students interested in the field of business/data<br/>analytics or becoming a "data scientist"</li> <li>Students whose job roles will require them to<br/>analyze/evaluate, and discover relationships in<br/>large data sets</li> </ul>                                     |
| MIS 5345: Decision<br>Making using Excel<br>(Fall, Spring, &<br>Summer) | This hands-on course uses advanced features of Excel for data analysis,multiple<br>applications linking, simulation modeling, and decision making under uncertainty to<br>model various types of business problems, to manage/manipulate large data sets,<br>and to work with non-standard (e.g. dirty) data.<br>Suggested Pre-requisite: none  | <ul> <li>Students who will take jobs requiring strong data<br/>analysis and presentation skills (e.g. financial<br/>analyst)</li> </ul>   |
| MIS 5346: Data<br>Warehousing<br>(Fall & Spring)                        | This course will cover techniques for designing, implementing, and analyzing<br>data in data warehouses using a hands-on approach. The course also discusses<br>managerial and ethical issues in implementingdata warehouses.<br>Suggested pre-requisite: some knowledge of relational databases  | <ul> <li>Students interested in the field of business/data<br/>analytics or becoming a "data scientist"</li> <li>Students interested in gaining deeper technical<br/>insight into the techniques used to organize<br/>enterprise data warehouses</li> </ul>                           |
| MIS 5355:<br>Management of<br>Information<br>Systems<br>(Fall & Spring) | MIS-5355 focuses on understanding key issues involved with managingthe<br>enterprise IT function. Topics include the role and impacts of IT, IT-business<br>strategic alignment, IT governance, project management, change management, and<br>information assurance.<br>Suggested pre-requisite: none   | <ul> <li>Students who seek to pursue a future in IT<br/>leadership as CIOs or CTOs.</li> <li>Students with a general management career path<br/>who desire to gain a better understanding of howto<br/>manage the enterprise IT function.</li> <li>MBA Healthcare Students</li> </ul> |
| ISEC 5305: Seminar<br>in Information<br>Security<br>(Fall & Spring)     | This course covers fundamental concepts in information security through providing<br>students with a common body of knowledge in key information security knowledge<br>domains. Coverage of these knowledge domains prepares entry-level professionals in<br>both technical and non-technical disciplines with the key skills and concepts needed to<br>contribute to the information security posture of their organization. | <ul> <li>Students in the Cybersecurity concentration</li> <li>Students who plan to be in technical industries</li> </ul>  |
